Ayushi Chaurasia

Noida, India +91-6307723551 ia.chaurasia3@gmail.com LinkedIn

Professional Summary

Frontend Engineer with 4 years of experience building scalable and high-performance web applications using ReactJS and TypeScript. Skilled in developing reusable UI components, optimizing application performance, integrating API's and building data-driven user interfaces. Proven ability to deliver end-to-end features and collaborate effectively in Agile teams.

Work Experience

- **EXL Service** Aug 2025 – Present
  Frontend Developer
  Noida, U.P
  - Owning end-to-end frontend development for AI-driven enterprise platforms using ReactJS, Next.js, and TypeScript.
  - Designed and developed reusable and modular component systems, improving maintainability and accelerating feature deliver.
  - Implemented authentication flows, protected routes, and session handling for secure user access.
  - Optimized performance using code-splitting, lazy loading, and efficient state management.
- **Persistent Systems** June 2022 – Aug 2025
  Senior Software Developer
  Pune, Maharashtra
  - Developed enterprise healthcare applications using ReactJS, TypeScript, and Redux Toolkit.
  - Optimized UI performance and handled large datasets efficiently.
  - Built dynamic forms using React Hook Form and Zod for validation.
  - Integrated REST APIs and handled complex data flows.
  - Collaborated with cross-functional teams in Agile environments to deliver scalable UI solutions and contributed to code reviews.

Projects

- **TranSuite** March 2026 – Present
  Next.js, ReactJS, TypeScript, Tailwind, Python, PostgreSQL
  - Built a scalable enterprise platform using ReactJS and Typescript to manage large datasets, interactive dashboards, and AI-powered document workflows.
  - Built reusable and modular UI components to improve maintainability and development speed.
  - Optimized application performance using lazy loading, code splitting, and efficient rendering techniques.
  - Integrated LLM/RAG-based workflows using LangChain and OpenAI APIs for automated document summarization.
- **HR Copilot** Aug 2025 – Feb 2026
  ReactJS, TypeScript, Material UI, Python, Microsoft SQL Server
  - Developed an AI-based recruitment platform for candidate evaluation workflows.
  - Built scoring, interview analysis, and admin dashboard modules.
  - Implemented real-time features using WebSockets.
- **VCR Park** Nov 2022 – Aug 2025
  ReactJS, TypeScript, Redux Toolkit, React Router DOM, Spring Boot, Microsoft SQL Server
  - Developed a healthcare platform supporting clinical workflows with real-time data processing.
  - Built reusable UI components and responsive layouts.
  - Implemented state management and routing for complex flows.

Techincal Skills

ReactJS
JavaScript
TypeScript
HTML5
CSS3
Redux Toolkit
React Router DOM
Material UI
Git & GitHub
VS Code
Postman
Microsoft SQL Server
Cursor AI

Education

Oriental Institute of Science and Technology, Bhopal
B.Tech in Information Technology
2018 – 2022

Modern Public School, Jhansi
12th CBSE
2017 – 2018

Certifications

PDEA Frontend Certification
Gemini Assistant Badge
AWS Cloud Computing 101
